Stencils *for cardmaking*

Joy! Stencils have been designed with pleasure and an eye for detail. This stencil can be used for embossing and decoupage. Secure stencil to the front of card using low-tack tape. Place them onto the light-box (card on top) and emboss the motifs. Turn card and stencil over and using a pencil, trace the parts to be cut out (and the outline of the stencil if you like). Remove the stencil and cut the traced lines. The cut-out stencil shape can be attached to a single-fold card of a different colour, with a contrasting colour in between if you like. Finish the card with 3D-pictures and decorate with ribbons and self-adhesive, flat-backed pearls. On the beautiful Joy! decoupage sheets the pictures have been drawn in handy step-by-steps.
