SILHOUET®

Silhouet Buxus card

By: Marianne Perlot

Fold the cream white card (Artoz Chamois) in half. Place the Silhouet mould Buxus (112307/1127) with napkin tape on the Mi-teintes dark green paper (115567/0448) and cut the buxus as you please. Also cut the border motif. Draw a line with pencil one inch from the sides (on the back of the card). Draw the next line two inches from the first line. Then draw another line on .7" from the top and the bottom. Then a rectangle appears which has to be cut out. The created buxus has to be cut of 0.2" from the cut border motif and be glued onto the cut rectangle in the card. You can further decorate the card with 3D and text stickers.
